### REMARKS/ARGUMENTS

Claims 21-46 and 53-92 are pending in this application. By this Amendment, Figures 6 and 8 are amended, claims 21, 28, 34, 37, 45, and 46 are amended, claims 47-52 are canceled without prejudice or disclaimer, and new dependent claims 53-92 are added.

Figures 6 and 8 are amended for informalities. As shown in the marked-up copy, Figure 6 has been amended to delete the incorrect label "Related Art" and to show the proper levels of sustain voltage level  $V_s$  to be consistent with the specification and the labeling in the Figure. Likewise, Figure 8 is amended to correct the informalities in regard to the voltage levels in view of consistent figure labeling and the specification. Hence, entry of the amendments to the Figures 6 and 8 is respectfully requested.

Claims 21-46 stand rejected under 35 U.S.C. §112, second paragraph. Independent claims 21, 45, and 46 have been amended to more particularly point out and claim the subject matter of the invention. The limitation set forth is clearly part of the feature of the claimed invention and not for the purpose of illustration, as set forth in MPP §2173.05(d). Hence, withdrawal of this rejection is respectfully requested.

Claims 47-52 stand rejected under 35 U.S.C. §102(e) over Myoung, et al. (U.S. Patent No. 6, 876,343). For the sole purpose of expediting the prosecution, claims 47-52 have been canceled without prejudice or disclaimer. Hence, withdrawal of this rejection is respectfully requested.

Claims 21-46 are indicated as allowable if amended to overcome the rejection under 35 U.S.C. §112, second paragraph. The section 112, second paragraph rejection is overcome with the above amendments and these claims are now in condition for allowance.

New dependent claims 53-92 are added. Claims 53-72 are dependent claims of allowable independent claim 46 and claims 73-92 are dependent claims of allowable independent claim 46. These dependent claims correspond to similar dependent claims of independent claim 22 with appropriate dependent claims deleted to prevent overlapping or double patenting of subject matter in view of independent claim 21 and dependent claims 22-44.
